# SACHS PERFORMANCE CLUTCHES

## SACHS PERFORMANCE PRESSURE PLATES

In comparison with volume-produced pressure plates, SACHS Performance pressure plates have a higher transferable torque and are more insensitive to thrust loads. Depending on the requirements, they can be combined with different disks..

## SACHS PERFORMANCE ORGANIC CLUTCH DISKS

Torsion-sprung and rigid disks with an organic surfacing are characterized by higher quality compared to standard clutches. The torsion-dampened clutch disks are suitable for high transmissible torques due to their robust construction and serve as vibration dampers between the engine and the gearbox.

## SACHS PERFORMANCE SINTERED CLUTCH DISKS

Sintered disks, available with torsion springs and rigid version, offer a higher thermal load capacity and an increase of up to 35% transferable torques compared to a standard clutch disc with organic surfacing, whilst using the same pressure plate. These sintered performance discs are very dirt-resistant and enable an aggressive start-up behavior.

## SACHS PERFORMANCE FLYWHEELS

Our weight-optimized and robust Sachs Performance single-mass flywheels (SMF) with the associated clutch parts replace the series dual-mass flywheels (DMF) for motorsport purposes. Thanks to their reduced weight, they enable the engine to rev up faster and, thanks to the FEM-optimized construction, a higher torque transmission compared to the complex and comfort-oriented DMF. Our modules were designed for a 1: 1 exchange to the serial clutch parts and thus enable a problem-free installation.

# AREAS OF APPLICATION AND USE

## Tuning vehicles

---

- Vehicles with chip tuning
- Turbo and compressor conversions

## Vehicles with high load

---

- Commercial vehicles
- Delivery and service vehicles
- Snow-clearing vehicles
- Driving school vehicles
- Taxis
- Recreational vehicles

## Tow vehicles

---

- Vehicles with trailer operation

## Motorsport

---

- Motor racing circuit
- Endurance racing
- Rally racing
- Drift racing
- Hill climbing
- Slalom racing
- Club sports
- Autocross
- ¼-mile racing

As prime features of SACHS tuning products, quality and high performance are a result of the company's years of involvement in the motorsports industry. It has been an equipment supplier for numerous race teams that have won over 100 races and made it to the podium more than 600 times. The comprehensive expertise gained on the toughest race tracks in the world has been directly applied to the development of SACHS Performance coilover suspensions and clutches, which means that even the most ambitious drivers are perfectly equipped with SACHS Performance tuning products.

# TECHNICAL INFORMATION

## NEW CLUTCHES

### ATTENTION RUN-IN PHASE!

Please note that new clutches require a running-in phase of several hundred kilometers. During this running-in phase, production and handling residues are removed and an optimal contact pattern for the clutch lining is created.

If the clutch is loaded too quickly or too heavily, the clutch lining can overheat and damage your new clutch. This damage is not covered by the product warranty.

#### **Optimal running in of a Sachs Performance clutch:**

- use the coupling frequently and with less loads
- Shift up early on the motorway and downshift as late as possible
- When starting up on a hill, do not let the “clutch slip” , work with the handbrake of your car
- Do not pull trailers or caravans during the first 500km

An occasional clutch picking is quite normal for the first few kilometers after changing the clutch. However, if this still occurs after about 1,000 km of driving, you should visit your workshop as soon as possible, as an error may have crept in during installation.

If you take these tips to heart, your new clutch will develop its full power and give you a long time to enjoy.

# GENERAL INFORMATION

The products listed in this catalog must be installed in a workshop by qualified personnel only.

This catalog is only an excerpt of our product range – our electronic media provide a complete overview.

To fulfill your request, we need the complete order number, for example:

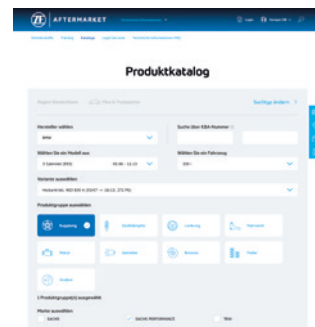

**Pressure Plate 883082 999798**

In case of doubt, please provide the type description and the model year of the vehicle for which the desired item is intended.
