One Pump – Four Variants

The new EPHS motorsport steering pump delivers top performance and intelligent flexibility.

Benefits

- Versatile and easy to install thanks to its compact design and the choice of four compensating reservoirs in different shapes and sizes.
- Flexible flow rate from 5 to 12 l/min at variable speeds ranging from 2,500 to 6,000 rpm.
- Operating pressure of 113 to 124.5 bar.
- Improved controllability at high speeds with generally lower steering effort.
- No connection to the CAN bus required.
- Lower costs due to shorter development time and volume production.

The EPHS motorsport steering pump

is available in four variants with different compensating reservoirs. This enables flexible installation in the vehicle.
