ZF Race TCR Suspension

The motorsport-proven ZF Race TCR Suspension provides a maximum performance in conjunction with a robust design.

Key Features

- 2-way adjustable in rebound and bump, completely independently from each other
- Adjustment range with high resolution, divided by 20 even clicks
- Lightweight design made of high-strength aluminum
- Bend-proof and sturdy strut design
- Ride height adjustment, without interfering with bump and rebound damper travels
- Integration of an additional damping valve for best compromise of high damping pressure and lowest gas filling pressure, for best possible response
- Tunable for your individual demands, with us or our service partner network
- Homologated for:

Seat Leon TCR

Audi RS3 TCR

VW Golf TCR
